249 which it is hauled by railroad or boat to the mill, although sometimes
497 the cane which is carried by boat is weighed at the mill. The rail-
505 roads which handle the cane, as has been indicated, are owned and
496 operated by the usinas, except that the government right-of-way is
471 used whenever these tracks pass close to the plantations. One of the
249 usinas is new and a few of the older mills have some new equipment, but the general level of technology is considerably below that of Pernambuco or São Paulo and the mills are somewhat smaller. The usinas grind the cane, extract the juices, and refine the sugar by means of vacuum pans and centrifuges. The more modern usinas produce a high quality sugar, but in general the product is coarse and not a pure white.
274 The by-products of the large usinas and part or all of the cane juice
385 of some of the usinas and engenhos is converted into rum or commercial
262 alcohol. The sugar, rum, and alcohol from the sugar industry of the
273
438 Recôncavo are consumed primarily within the Recôncavo and the adjoining
439 regions of Bahia. About one-tenth of the production of sugar is
382 exported, chiefly to Rio de Janeiro. The commercial alcohol usually
385 is mixed with gasoline in the bulk plants in Salvador to provide fuel
654 for automotive transport. By law a specified amount of commercial alcohol must be mixed with gasoline--this is designed to subsidize the sugar industry.

249 There are twenty usinas in the Recôncavo, and these produced
471 an estimated 80 per cent of the total sugar of the state of Bahia in
433 1948. The three largest of these are owned by a single sugar company, which also owns the associated plantations, transportation equipment, and cattle fazendas. This company plays an important role in the
249 marketing of sugar from its own usinas and from other companies. The
471 concentration of the cultivation of sugar cane and of the production
178 of sugar in the hands of this single enterprise is a symptom of the
